- architectural design studios, planning and design companies for all industries,
- construction companies,
- entities supervising investment projects.

The scope of provided services is focused on all types of risk connected with the investment process, especially with:

- general civil liability insurance,
- professional civil liability insurance,
- construction all risk insurance,
- advance loss of profit insurance,
- insurance guarantees,
- other areas which can be covered by insurance.

We provide services for:

over 140 planning and design companies

a dozen or so construction companies

supervising companies

developers and investors

WHAT MAKES OUR COMPANY UNIQUE

Our strong position on the market is attributable to the support of the owners, who, due to their **engineering, legal and economic** education, as well as experience in construction industry, guarantee appropriate and adequate insurance services for every possible problem which may arise in connection with the construction market. As a result, **we interpret the language of insurance and we employ it for the benefit of the engineering industry, which allows us to prepare a professional insurance offer tailored to your needs.**

At our disposal we have a team of specialists qualified in the area of insurance. We make every effort to ensure the stability of our personnel, which makes conducting business with us very convenient for our Clients.

We are focused on protecting our Clients' interests in regard to concluded and executed contracts.

We approach each project individually, irrespective of its size.

We also negotiate terms and conditions in **international relations**.

We are at your disposal, providing assistance in a **wide scope of insurance matters**.

We offer support **on each stage of the investment process**, from the very moment the terms and conditions negotiation of the contract commence.
